

Funkcionális Élelmiszerlánc Terméktanács

6000 Kecskemét, Városföld 92. I. em. 114.

Confirmation

Biokontroll Hungária Nonprofit Kft. is an approved organic inspection and certification body in Hungary. For the most part of its operation it carries out inspection and certification according to Council Regulation (EC) No 834/2007 and Commission Regulation (EC) No 889/2008.

In case of fields covered by the regulations but not regulated in details for organic rabbit keeping, game farming in game preserves and quail keeping Biokontroll created private standards, approved by the authority.

Among the fields not covered by the regulations, recognising the consumers' and manufacturers' demands, on 11st September 2015 the private standards for organic mass catering and organic cosmetics implemented so far have been supplemented by the prescribing document "Standard for labelling of bottled mineral water, spring water, and soda-water and medicinal water produced from these as "bio" and/or "organic"".

First the company AQUA-PLASTECH Kft. (4251 Hajdúsámson, Diósvár 23/A., manager: Darabos János, hereinafter referred to as: Applicant) made a request regarding the water bottled by them to us to determine that these are in compliance with the requirements for organic water of Biokontroll Hungária Nonprofit Kft.

On-site inspection was carried out by Biokontroll Hungária Nonprofit Kft. on the production premises and seat of the Applicant in Hajdúsámson in September 2015 and the Applicant fulfilled the deficiencies required.

On the basis of the information available Biokontroll Hungária Nonprofit Kft. formulated the preliminary opinion as follows:

Water extraction, water treatment and bottling practices of AQUA-PLASTECH Kft. (4251 Hajdúsámson, Diósvár 23/A) are in compliance with the requirements set out in the organic water standard of Biokontroll Hungária Nonprofit Kft.

This confirmation was provided at the Applicant's request.

Budapest, 20th October 2015

Dr. Roszík Péter
executive manager
